

## VoIP Tracker

Let's get some Mac & VoIP Interaction !

### What is VoIP Tracker ?

VoIP tracker is a monitoring application for your VoIP devices (currently only Sipura/Linksys devices are supported). VoIP Tracker displays basic information about your VoIP device so that you don't have to browse through a web administration interface.

You can quickly answer questions like :

- is my VoIP device correctly registered ?
- what are the current settings ?
- what are the current call settings (inbound/outbound, VoIP/PSTN, phone number, codec in use ...)

VoIP tracker also let you restart your VoIP device with a click of a button.

Moreover VoIP Tracker gives a way to your Mac to interact with your VoIP device :

- Visual Notifications (with lookup in your Address Book)
- Speech Notifications
- Change your iChat status when you pickup the phone
- Pause/Resume iTunes
- Password support

### VoIP Tracker dress code

The application icon will change colour to quickly let you know the status of you VoIP device:

- original icon : no issues, no call in progress
- Icon with an exclamation mark : VoIP device not registered (you might not be able to use your phone or your calls are switched to PSTN)
- "globe" : VoIP call in progress
- green : inbound PSTN call in progress
- red : Outbound call while the device is unregistered

### What is different from VoIP Tracker Lite ?

VoIP Tracker Lite is a basic version : it does simple things and does it well.

VoIP Tracker includes more advanced features that let your VoIP device interact with your Mac

### What is the price ?

VoIP Tracker Lite is shareware. You can use it, fully functional, for 15 days. During this period, you can purchase a licence at anytime (click on "Registration" in the VoIP Tracker menu).

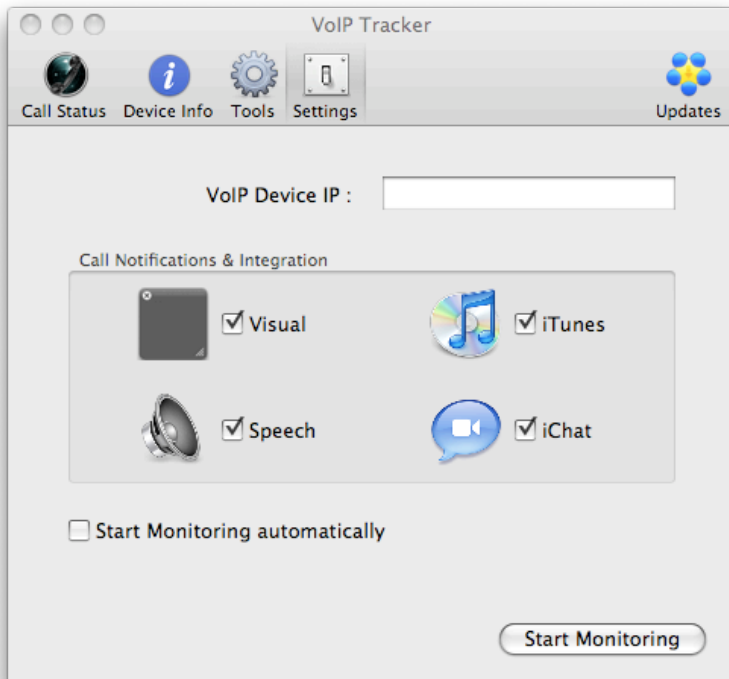

Licences are available in single and small business (5 users) packs.

### Get Started

Get Started in 4 easy steps

Step 1 : Start VoIP Tracker

Step 2 : Type the IP address of your VoIP device

Step 3 : Click on "Start Monitoring"

Step 4 : You're done !!!!

### Software Updates

VoIP Tracker is under continuous development and we want to make sure that you always run the latest version.

As a result, an automatic update engine is built-in and you can even the way update checks are done

On the Update tab, you can decide how often you want an update check to be done : Daily, weekly, monthly or disable automatic checks (you can still do manual checks).
